

G2 energy systems

Battery Energy Storage Systems (BESS) allow a reduction in reliance on the grid. They can be used with a wide variety of renewable technology to help businesses build more sustainable operations.

As a Lloyds NERS registered Independent Connection Provider, g2 Energy can complete Grid Connections and "Balance of Plant" infrastructure works across a number of sectors. This includes,

G2 Energy Systems: Powering Tomorrow's Grid With Smarter Solutions Let's start with a confession: G2 Energy Systems didn't invent the wheel - they're just making it spin smarter. In an industry
